Year 1

Mechanisms

Design and Technology

Vocabulary

Slider	Has a bar or rod that moves forwards and backwards or side to side
Slot	A narrow groove, slit or opening
Fastener	A device used to attach pieces of materials together. You will use split pins
Pull/push	A force used to move an object away or bring it closer

You will make a sliding picture using a slider mechanism. You will also join materials together using fasteners such as split pins.
